* If greater differential pressures are required than those shown, a No. 12 Actuator should be used. A No.12 will double shut-offs shown.

(1.) Maximum $\Delta P = P_1 - P_2$ where $P_2 = 0$ PSIG

Maximum ΔP cannot exceed maximum valve working pressure.

(2.) Actuator supply pressure required to fully stroke valve. (3.) ΔP and supply pressure based on a 3 PSIG Actuator Spring Pre-Load.
